PERSONAL PROJECTS

-Portfolio

I am delighted to present my portfolio website, a digital representation of my skills, accomplishments, and professional journey. This platform serves as an online showcase of my work, allowing visitors to gain insight into my expertise, projects, and passions.

- Tools & technologies used: HTML, CSS and JavaScript
- This website can be considered a short resume of mine, where people can check my achievements, works hobbies and skills!
- The main feature includes responsiveness, hover effects, Home, About section which have my skills, interests, projects and contact where we can connect on LinkedIn through the links I have added in my website.

-Spotify Clone

Creating my Spotify clone was an exciting and rewarding experience. Although it may be a basic and simplified version of the original platform, it allowed me to gain valuable knowledge and hands-on experience in web development. It is a responsive website which will give you insight of my playlist!

- Tools & technologies used: HTML, C
- I created this website to implement my learning of JavaScript, I learned about how can I can use control buttons in my playlist to skip, pause and play the songs.
- The features of this website include responsiveness, use of control buttons to skip and play whichever music you want from the playlist.
